Product Overview

Steri-Strip Adhesive Skin Closure. Sterile skin closure strips made of a porous, non-woven backing coated with a pressure-sensitive, hypoallergenic adhesive and reinforced with filaments for added strength.

Product Benefits:

- Results in greater resistance to infection than sutures or staples.
- Fast and easy to apply to save time.
- Less pain during application for improved patient satisfaction and better cosmetic results than sutures or staples with less scarring.
- Non-woven backing reinforced with filaments for added strength gives confidence that the wound will stay closed and heal with greater strength.
- Hypoallergenic adhesive.
- Available in a variety of sizes to meet your procedural needs.
